

Submitter: Elizabeth Chandler

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3681

HB 3681 is a True Climate Bill! It removes regulatory roadblocks and duplications in permitting clean electricity power plants and transmission lines.

Electricity demand is projected to increase by 30% in Oregon over the next decade, but we are not building new grid infrastructure fast enough to keep pace.

Streamlining regulations will enable faster and simpler transmission planning.

This really matters because climate change is accelerating, and we have only limited time to build out clean energy infrastructure.
