

Submitter:

Terese Keller

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB3365

I'm constantly amazed at how many people still don't understand the difference between climate change and weather in general. When it is colder, they say "so much for global warming!" More extreme weather PATTERNS are a result of climate change, with both heat waves and extreme cold events. Given the nature of the climate change emergency, it is vital to improve public understanding of the science behind it, and it is the coming generation that will be most impacted by it. Please support HB 3365.
