

Submitter: Tom Parker

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or Topic: HB3932

Oppose HB 3932,

This bill would harm the beaver population in Oregon more than you would think. When populations of beavers are left unchecked they overpopulate an area and are susceptible of spreading deadly diseases. I have seen tularemia spread through colonies of beavers and wipe them out completely. Trappers keep the population in check, strengthen the beaver colonies, and produce a higher quality of life for these beautiful animals. If you love our beavers then you should oppose this senseless bill.
