

Submitter:	Bert Highland
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

The only economical way to control beaver populations is by lawful trapping. When beaver populations are left unchecked their numbers spiral out of control and their activities cause great damage to agricultural lands, timber resources, roadways, and other infrastructure. The costs to repair these damages ultimately fall upon the taxpayer. Please refer to the "North American Wildlife Management Model". Please oppose this unnecessary legislation. Thank you.
