

Submitter: Curt Yannone

On Behalf Of:

Committee: Senate Committee On Natural Resources and  
Wildfire

Measure, Appointment or Topic: HB3932

HB 3932 would greatly prohibit the ability to responsibly manage beavers that can cause significant monetary loss to the taxpayers through various means of destruction to the landscape. An annual reduction in beaver population serves to help aid in protecting public health from giardia and fecal contaminants, as well as protect and diminish bank and pond damage from burrowing, timber damage from dam building/flooding, and possible crop loss. Please consider opposing this measure and allow the ODFW to manage properly manage the resources that they are given domain over.
