

Submitter:	Jeff Noel
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

Beavers are incredibly effective at improving water quality. HB 3932 would temporarily close beaver trapping where they are needed most: on rivers and streams that are contending with elevated water temperatures and high levels of sedimentation, toxins or other pollutants. The recent flooding outside of Burns is but one example of the benefits beavers can contribute to filtering, slowing and improving water flow rate and quality. Thank you for your time.
