House Committee On Revenue

Measure, Appointment or Topic:

HB2977

1% for wildlife is a very modest step toward supporting the wildlife that make Oregon the special place it is. Every corner of Oregon has defining wildlife that draws in tourists and enriches the lives of locals. Given the extinction crisis we have created through climate change and over development, we must act to ensure we don't lose more of Oregon's wildlife than we already have. Future generations of Oregonians and tourists are depending on bills like this to support wildlife.
