

Submitter: Meg Bowman

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3681

To Senate Energy & Environment Committee Members,

I write to ask that you support HB3681, one of the many steps needed to protect us from the worst impacts of climate change. HB3681 will remove regulatory roadblocks and duplications to permitting clean electricity power plants and transmission lines.

This needs to happen nationwide, and state and regional progress is vital. Climate change is accelerating, and we have limited time to build out the clean energy infrastructure we need for the next generations to survive.

Thank you,

Meg Bowman
