

Submitter: Diana Downing

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: HB3824

We see a significant number of patients that would benefit from dry needling, and we have clinicians certified in this skill but have to send patients to Idaho or Washington for this service and many cannot afford the mileage or commute over winter road conditions. We also see many patients needing durable medical equipment to improve safe functional mobility in a rural setting but are living on a very limited income. So please support this measure to improve health care in our state and especially in rural areas such as ours.
