

Submitter:

Ruppert Reinstadler

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB3365

The premise of this bill is insane. More political indoctrination? I don't think so. Our kids are off limits to the supermajority's indoctrinations! Our children do not need to learn about climate change in the way the supermajority uses it as a political weapon to siphon money from The People. The climate has been changing since we've had a climate, we can't TAX our way out of it! We can help mitigate it though, relatively easily - MANAGE OUR FORESTS so they stop burning down each year and releasing millions of tons of greenhouse gasses into our air and atmosphere! The amount of co2 emitted during a single fire season in Oregon, is equivalent to all the automobiles in Portland running 24 hours a day, all year long! Half the weight of dried wood is carbon, which is locked up unless it burns. I 100% oppose this bill. Teach our kids to read and write before anything else.
