Measure, Appointment or Topic:

SB243

All the bills as well as laws being passed do nothing to stop gun violence, and if anything make it even worse by making more gun free zones we all know that the people who commit gun violence are not going to abide by the law and are going to choose gun free zones to go on shooting sprees because they know that there won't be any law abiding citizens with guns to stop them. All these waiting periods and steps to delay people from getting guns for all people dose nothing but make life harder for people that already own guns and are just adding to their collection. All these waiting periods could cost people their lives if there is a threat from a disgruntled employee, an abusive spouse, stocker, etc. the extra costs that these new bills and laws will stop many people that need them to protect themselves from being able to afford them, in other words you will be catering to the rich and leaving the poor unable to afford to protect themselves.

Sincerely Wes Plantz
