SB243

Yet another unconstitutional attack on our 2nd amendment right. There is no evidence that any of these proposed regulations would have any positive affect. This bill also has no way to be funded or any plan on how it would be enforced. Gun free zones have already proven ineffective, all they do is inform criminals that the places with these signs are defenseless and easy targets. How many people will die while waiting to purchase a firearm for protection because of this bill IF passed? When is it going to be clear that the only people you are "helping" with these so called "gun control" bills is the criminals! Isn't it crazy when you look at the statistics of the places with the most gun control laws in place they are also the places with the most violence. Please VOTE NO on this!
