

### **HB3681**

I urge your support and passage of HB3681. We need to streamline the process for adding new power transmission lines and facilities. This bill will make it easier to improve the reliability of Oregon's power grid and to add renewable energy generation sources to locations in Oregon where the need is greatest. Oregon's system of energy distribution must keep pace with demand in order to grow our economy.

Thank you.

Dennis Hickman, P.E., MSEE
