

Submitter: Pamela Fitzpatrick

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3681

I very much support HB 3681. We will soon be desperate for the generation of more climate friendly electricity (wind, solar, geothermal) and clearly we are past our need for an updated grid system. This bill is well thought out and leaves room for further discussion of exceptional cases. It's time to remove road blocks to the evolution of a less polluted environment. Thank you for supporting this bill.
