

Submitter: Diana Richardson

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3681

This is truly a bill which addresses obstacles to meeting the challenges of need for increased energy through non- polluting or less- polluting sources.

With the changing climate bearing down on us in terms of catastrophic consequences, we must do all we can to prepare in a well-planned and thoughtful way.

Please pass this bill which will also cut out a great deal of waste in terms of time, energy and dollars lost in legal red tape.
