Committee: House Committee On Revenue

Measure, Appointment or Topic: HB2977

As a fisherman and wildlife photographer for 60 years I've witnessed the tragic decline in numbers of all wild fish and animal species. Climate change and habitat loss have contributed to the precipitous decline of all animal species. Using a small lodging tax to slow this loss of animal species makes sense on so many levels. We just can't afford the tremendous loss of wildlife. We are witnessing our own fate. Please support 2977 lodging tax. It makes so much sense!! Rich Bergstrom
