House Committee On Revenue

Measure, Appointment or Topic:

HB2977

Hello, I am writing about House Bill 2977 A recent economic analysis found that HB 2977 will

Support Oregon's outdoor economy by investing in nature and boosting visitor spending. There are 294 at-risk species in Oregon that need our help! These are species of greatest conservation need. We don't want our state to lose these valued treasures and the reason so many people come here to visit and vacation!

Oregon's Conservation Strategy is lacking the necessary resources and funds to fully implement the recommended conservation actions. Please here Oregonians out when we say we want our wildlife and natural resources protected!

Thank you,  
Anna Kirgiorgis
