

Submitter:	Casey Cook
On Behalf Of:	
Committee:	Senate Committee On Natural Resources and Wildfire
Measure, Appointment or Topic:	HB3932

I feel this bill is a direct attack on my constitutional rights and will directly affect revenue of a regenerative resource that is managed by the public whom are licensed to do so. This is also taking away part of our history as a country. I have first hand experience of managing beaver populations on public lands that affect public transportation. With this bill I would no longer be able to do so and in turn take away money from the budget of my county which needs to be used in other areas. I personally spend around \$500 to the state just to be able to pursue animals which feed my family throughout the year. This bill would take away a good food source and impact how much I spend to how much food I get. It also takes away a portion of how much money I get at the fur sale to help offset costs throughout the year. Nothing is getting cheaper and all I see coming is more taxes. Why get rid of a renewable resource that brings money back into the economy. So I see this bill as a direct attack on my rights, my family's way of life, it takes away some of our food, it removes part of our income, and will cost the taxpayers more in the years to come.
