

Submitter: John Daniel
On Behalf Of:
Committee: Senate Committee On Natural Resources and
Wildfire
Measure, Appointment or Topic: HB3932

The National Trappers Association has great concerns over the unaddressed pit-falls and potential environmental hazards this bill may be liable for. There is potentially millions of dollars worth of Oregon tax payer liability in maintenance, damage to endangered species, affected private lands, agriculture and more.

To date we have seen no management plan incorporated in this bill.

It is our opinion this bill is very short-sighted and lacking in research and data.

We believe it is reasonable for the sponsors of this bill to produce the findings of any environmental studies and estimated initial costs and annual maintenance costs of this proposal.
