Measure, Appointment or Topic:

HB2977

Oregon's diverse wildlife is part of what makes our state so special, and it's also a big reason why people visit. Nearly 300 native species need urgent recovery, yet state funding is falling short. Over five years, the 1% of Wildlife could add millions of dollars each year for critical conservation programs. This is an investment in nature and Oregon's economy by boosting wildlife-related tourism.
