SB238

Expanding law enforcement's use of drone surveillance is something straight out of a dystopian science fiction novel. Law enforcement already has funding and resources to carry out their duties. Drone surveillance, frankly, sounds like a tool that will be abused, allowing law enforcement to further target immigrants and people of color. Let's focus our attention on making resilient communities that don't need to rely on police to stay safe - addressing root causes like poverty will go a lot further than drones.
