House Committee On Judiciary

Measure, Appointment or Topic:

SB238

This bill is a gross violation of my civil rights and my right to privacy. Allowing police to surveil people without a warrant is a gross violation of my fourth Amendment rights. At the national level we are seeing a Trump regime that is more interested in suppressing the people and using police to suppress any criticism. This bill clearly plays into the regimes hands. It makes us more of a police state while eroding civil liberties and freedom. This bill will make it easier for police to harass and suppress anybody or group they disagree with. This will reduce protections for anybody that isn't part of the dominant society, especially immigrants, Black people and other people of color.

This is an egregious bill that should not see the light of day.
