Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

SB238

I oppose allowing police to use spy drones. I value my family's privacy. So far I have unplugged my Alexa and left Facebook. I am looking for other ways to protect our privacy. Data about citizens may be safe with one administration and used as a weapon during another administration. It may be used for beneficial business purposes by one CEO and abused by another. It is safest to not allow any surveillance without a warrant. And the Fourth Amendment's prohibition on warrantless searches and seizures means that if this law passes it will likely take resources from our state as it is sure to be challenged in court. Please vote 'no' on this bill.

Thank you,
Rebecca
