I whole heartedly support the repairs at Osborne aquatics center. I do not use the center however a town pool is a sign of town health, overall. It enhances the health and wellbeing of users and especially young people. It's a great analog activity and gets people moving. This keeps healthcare costs down overall and helps create community. I don't mind paying and support levies and taxes to keep it open and maintained. Please fix it. It's such a happy place for many!
