

Submitter:

Stefan Hermannsson

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB2251

We have all witnessed first hand the miscommunication that occurs from peer to peer on social media. We have all seen the nearly unlimited distraction caused to full grown adults by the use of smart phones. I see no need for "smart" devices in schools. At the very least we can delay smart device usage until kid's minds are more developed. My kids are currently in 2nd and 3rd grade and I intend to issue them both limited capability flip phones when they are of age. We know that this challenge will be met if we all hold the line against the endless onslaught of dangerous challenge videos, online bullying, cat videos, and epic fails.
