Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB2251

I don't support this bill. Students need their phones for use in an emergency! Whether its a school incident or personal issue. They need to call 911 or their parents. Emergencies happen on the way to and from school. Cell phones cover this need. Teachers and other school staff need to learn how to control their students and have real consequences for the student if they don't comply. Schools are publicly funded so if something was recorded, their shouldn't be anything said or done in school that would reflect degatively on the teacher or the schools.
