

Submitter:

Patrick Mahoney

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB2251

I'm a dyslexic who was raised in the 60s when dyslexia was not well understood. I continue to really struggle.

If you oppose this bill all of your children will have dyslexia and other neurodivergent disorders only because the State refuses to actually teach and remove cellphones from the classroom.

I support this measure AND recommend students leave their cellphones at home - otherwise they will spend their off time between classes bullying others. Gossiping. Forgetting what they were taught.
