Senate Committee On Health Care

Measure, Appointment or Topic:

HB3824

I strongly oppose the widening of PT scope. It directly infringes of the chiropractic scope. They do not have any training in performing spinal manipulations. They do not have training with needles nor do they need that training as it does not relate to their scope. There is no basis for need to vaccinate especially when they do not have pharmaceutical education. They do not have education on differential diagnosis to determine the need for application of these suggested treatments.
