

# Please Support SB 181

and include ending the use of Primates in research.

Dogs Cats and Primates are sentient beings, intelligent and social creatures that have every right to live their lives, as much as we do. A life spent in a cage being tortured and experimented on is horrendous and inhumane. We must stop this.

And the only difference between us and primates is that they don't speak our language and cannot speak up for themselves. Dogs and cats communicate as well, if we bother to listen.

Oregon needs to step up to step up to the plate and end this barbaric treatment of other species. Please support ending these facilities within our State (and ultimately shutting them down everywhere, we can help lead the way!).

Thank You for hearing me, and hearing them who cannot speak for themselves.

Sincerely

Derek Lehrman

Salem, Oregon
