

Submitter: Richard Formica
On Behalf Of: HB2251
Committee: Senate Committee On Education
Measure, Appointment or Topic: HB2251
Gentlemen:

I am a Bend psychologist. I train other psychologists, through the Oregon Psychological Association and the American Psychological Association, in the clinical intervention known as Parent Counseling.

There is SO MUCH CLINICAL INFORMATION that access to cell phones during the school day interferes with both learning and with mental health, that I implore you to do the right thing, PASS THIS BILL FOR THE SAKE OF OUR CHILDREN.

DO NOT TIE IT UP IN COMMITTEE FOR POLITICAL REASONS.

Our children's mental health and learning transcends politics.

Dr. Richard Formica
