I hope this message finds you well.

My name is Sander Weisz, and I am writing to express my deep concern regarding the prolonged closure of the Osborn Aquatic Center in Corvallis due to significant roof corrosion. As a resident of Lincoln County, I have witnessed firsthand the profound impact this closure has had on our children, particularly those who rely on the facility for swimming training.

Many young swimmers from Lincoln County, including my own child, commute daily to Corvallis to utilize the Osborn Aquatic Center's long-course pool. The facility's closure has disrupted their training schedules and forced them to seek alternative venues that are often farther away and of lesser quality. This not only increases travel time but also diminishes the quality of training, which is crucial for their physical and mental well-being.

The Osborn Aquatic Center has been a vital resource for our community, offering a safe and accessible environment for children to develop their swimming skills. Its closure has left a significant void, and I am concerned about the long-term effects on our children's health and development.

Sincerely,

Sander Weisz
