Repair for Corvallis' Osborn Aquatic Center is a fantastic use of state funds. Their spectacular programs for youth swimming was one of the reasons we moved to Oregon to settle and raise our family. We would bike our kids there multiple times a week for lessons and fun with the family and friends, and the pool is always full of kids enjoying bring active.

Now our children are older, and our son has been finding tremendous health and social benefits as well as life skills on the Corvallis Aquatic Team. I've also personally used the pool to help me train for world class athletic competitions and for injury rehabilitation. My daughter has been employed there too teach swimming lessons, and would like to continue doing so.

Please help repair and preserve this amazing, essential community resource!
