

Submitter:	Wyatt Hunter
On Behalf Of:	Myself Fire victim
Committee:	House Committee On Judiciary
Measure, Appointment or Topic:	SB926

On September 2020 in Eagle Point I watched a catastrophic fire make its way towards my in laws home while we evacuated. It was making its way towards us while we grabbed what we could before having to run to the car and leave. We left behind many animals in an attempt to safely flee the fire, one of the cats we were not able to get was my own. I fully support SB 926 because everything that happened that day should have been prevented. This bill will provide accountability for the wrong doing of a large corporate company. I have watched my in laws struggle to complete their rebuild and continue to see devastation when we go visit them, what used to surround their home in lush greenery is still almost 5 years later bare and burned. SB 926 will also allow a billion dollar company to pay for their recklessness without help from the community which has no fault in the fire. We have already had our rates raised this year while PacifiCorp has yet to settle their debts. I fully support SB 926 and the justice it would help bring.
