

Submitter:

Gustavo Barraza

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

HB2251

Hello I'm Gustavo and I can say firsthand that the majority of issues in school arise or are amplified by the presence of phones. It's nearly impossible to differentiate where problems and phones are separated. Therefore beginning to focus on phones and to get rid of them entirely in schools feels like a necessity. For a person can not begin to grow with a device that is psychologically designed to keep that person small.
