On Behalf Of:

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure, Appointment or Topic: SB181

"Medically unnecessary" laboratory research: that's key to why this Bill should be passed. May I use what are called "The Two Principal Principles of GoldenRuleism" to provide the foundation for my support of the Bill:

"Do for all others, both directly and indirectly, what you would want done for you. Don't do to any others, either directly or indirectly, what you wouldn't want done to you."

"The Two PPS" don't permit such unnecessary "research." It's patently immoral and unethical for such heinous and inhumane treatment of these innocent "others" to continue. So, please discontinue it.

Thank you.
