

Submitter: Karen Jealous

On Behalf Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure, Appointment or Topic: SB181

It is 2025 and the time is now to ban medically unnecessary lab research on dogs, cats and other animals. Our country should be past this. There are multiple other ways in which to gather the necessary medical information and this painful and medically unnecessary lab research is inhumane, unnecessary, and a waste of public funds. This also includes ending the use of primates in research.

Thank you.
