Measure, Appointment or Topic: SB243

Well, I object based on the fact the State Police are supposed to have a records clerk who does immediate background checks with instant reports. The Second Amendment Protections aren't ambitious nor ambiguous. If you like history, and in depth history, you'd know that the Judiciary was actually passed after the amendment protections 1-10.

Who was that to?

Given the Historical documentation I supplied along with this and the heirarchy of military subordinates, as much as you were accepted you had responsibility I don't see fulfillment of to your people. I never in my life planned or thought the Oregon State would act in this mannerism, where it's necessary to remind you with cause, that each and every one of you took a Hippocratic Oath to supply your people, which I am one of, a forever version of immediate background information in which historically there has always been criminals whom are excluded.

My personal background information shows a felony because due to your last decade or 2 of time, you're increased the imposition upon your people as if I'm historically bearing down on you. I'm here to say that is false and there is a warranted federal gasp.

We have peace agreements, and I expect you to follow them. In 1851 you were given this land as members of your public moved West. Prior it was mine to have as a playground with the kings approval.

I abhorrently and vehemently deny in Monarchical Dominion law, your impositions of all of this extraneous and prejudicial material.

Men, or women acting as men, who choose to be reckless and defy civilian life here, they have an end they so chose in their life path. I may not be "Donald" but I'm your Joint Operator of WW2 and this lately in speech, and weapons, and many other items of law are despicable. Absolutely despicable.

Not even cannabis makes you act like this and I can rectify that federally personally if they choose to opt into phased trials.

-Jacob D. Anderson.
