

Submitter: Launa Santi

On Behalf Of:

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure, Appointment or Topic: SB181

To Whom it May Concern:

Dogs, cats and monkeys - their use in university laboratories isn't questionably cruel or wasteful; the fact is that Oregonians recognize and reject the practice that in the past has been overlooked. Aleksander Von Humbolt stands out for knowing the holistic view of nature as a complex, interconnected systems brings sense to science. Exploiting species contradicts any 'medicine' supposedly gained. Please know that the significance of funding places where disregard of well-being inflicted cannot be understated. Do not use state funds to perpetrate crimes of cruelty.

I support prohibiting a research facility from using public funds to directly fund medically unnecessary laboratory research on dogs or cats.

Sincerely,
Launa Santi
