Senate Committee On Rules

Measure, Appointment or Topic:

SB243

This bill would create a waiting period in which nothing would be accomplished other than hinder gun dealers. By forcing them to store already sold and approved guns on premises for longer. Even though the buyers have already proven their clean record with the government's of this countries judicial systems. It would also put the most vulnerable people in our communities at more risk for being victims since they wont be able to go and same day a gun after getting a restraining order on a violent family member or partner seeking to harm them as we already know criminals dont follow laws that are on the books as they stand. That last point also makes the rapid trigger activation devices language completely null and void since anyone looking to have and use one of those in comission of a crime is already breaking the law anyways as well as some of them are illegal already anyways. This bill is gut and stuff garbage written by people with a hollywood surface level undersranding of firearms and laws.
