Senate Committee On Rules

Measure, Appointment or Topic:

SB243

Strong opposition to SB243.

It violates expo facto law as well as the taking clause of the constitution. Activators have been proven legal in federal court and they are owed legally by so many Oregonians that this bill seems to be written to make criminals out of law abiding citizens. When I owned a store I sold thousands of them and they are not used in crimes because they aren't conducive to such things. A very popular is a tipman Gatling gun, legally owned by most serious collectors. Gatling guns have been around since the 1800s and collectors will not destroy them. If passed, this bill will end in many lawsuits against the state. It's wrong in every way.

As far as the wait period part, it's opposed for obvious reasons and would be akin to forcing people to wait 72 hours before sending an email. It exceeds the definition of an infringement

Respectfully

Dan
