

Submitter: Emily Heilbrun

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3336

Chair Sollman and Members of the Committee,

Oregon needs to bolster its transmission capacity to help reliably and affordably deliver clean energy to Oregonians. Therefore I strongly urge your support of HB 3336.

In order for Oregon to meet its 100% clean electricity mandate, serve our growing economy, and create resiliency on our grid, Oregon must address our transmission bottleneck. We need transmission solutions that protect ratepayers and keep Oregon's electricity system resilient and reliable.

HB 3336 (Grid Enhancing Technologies) is a commonsense solution that will expand transmission capacity by requiring utilities to deploy cost-effective technologies to existing infrastructure.

Please support HB 3336.
