

Submitter: Andrew Leisner

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3336

Chair Sollman and Members of the Committee,

I write to urge your support on HB 3336, which will bolster our State's transmission capacity to help reliably and affordably deliver clean energy to Oregonians. Oregon is rated 47th out of 50 States for renewable energy growth. This miserable performance is almost entirely due to our electricity transmission bottleneck.

HB 3336 (Grid Enhancing Technologies) will expand transmission capacity by requiring utilities to deploy cost-effective technologies to existing infrastructure. It is just one of many steps to help us actually be the green state we claim to be.

I respectfully urge your support on HB 3336.
