Senate Committee On Education

Measure, Appointment or Topic:

HB2251

Dear Senate Committee on Education,

I oppose this bill and ask you to do the same. As an educator, I dislike phones in the classroom and free time during the school day, however the State does not need to get involved. This is being handled at the school district level. There is no need for the government to be wasting time on this bill. I have a student who monitors glucose levels using his phone. There would be no reason to not allow this from taking place. I am also reminded of terrible events that have taken place at schools where students have called for help. If you want to watch more of a mass exodus of students from public school, this bill will do it. I recommend opposing it.
