Measure, Appointment or Topic:	SB926

Originally it was Gates/Mill City combined, that has now been divided, and Gates needs to seek funding for pipelines from Gates to the Mill City treatment facility. Forget the Amount \$20-\$25 million? I know commissioners Cameron, Colm, And Bethel are working on the funding, as most in the legislature are probably aware of as well. F Gates does not get funding; Gates will die a slow death and never recover from the fires. The Fire destroyed 70% of Gates, maybe 30% has rebuilt., leaving Gates with huge revenue shortfalls. The fact Gates as a Municipality has survived this long is an amazing testament to its employee, Greg & Traci....both hero's during the fires too for their dedication to the city of Gates.

Pacific Power destroyed & maybe killed off a municipality as well!!

I would encourage Legislators to make sure to further this cause, & dee Gates gets the help it needs. In my opinion, Pacific Power should be held liable for the pipe line installation costs, though doubtful there is an avenue or mechanism to implement that sentiment!

Sorry so long, but hard to cover all the nefariousness pf Pacific Power & emotional trauma of thelast 4 yrs in such a small space....
