

Submitter: Richard Barnhart

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3336

Members of Committee,

We need transmission solutions that protect ratepayers and keep Oregon's electricity system resilient and reliable.

HB 3336 (Grid Enhancing Technologies) is a commonsense solution that will expand transmission capacity by requiring utilities to deploy cost-effective technologies to existing infrastructure. I urge you to support HB 3336. Thank you.
