SB547

I am writing urging that you support , the Bill to designate April as native plant month. This is a no cost way to help elevate the importance of plants in creating an ecosystem that is healthy for humans and animals.

There are many ways that people interact with their natural world and plants are the easiest and most accessible way one of the most easiest and accessible ways.

Awareness of plants, brings awareness of pollinators, and so an inquiry into ecology and the way in which the whole world functions if we let it is begun. Plants are an incredible educational opportunity.

Plants also make us feel better. Our well-being our mental well-being is enhanced by the plants around us.

This bill will help elevate and explain the necessity of plants and in doing so energize many of the local organizations and schools that teach : plant health is earth health, is human health.

Please pass this no cost bill
