Committee:

House Committee On Rules

Measure, Appointment or Topic:

HB3971

Good morning House committee,

I am writing you in support of bill HB 3971. Lane county, like numerous counties across the West, needs to invest in sustainability to ensure those to come after us have a livable, wonderful world to inherit. Investing in a materials recovery facility is a great way to supposed this goal. Such a facility would reduce methane emissions, create more landfill space as our community continues to grow, create more jobs in the field of sustainability which is always in need of more specialists, and push us towards the goal of reducing the total community greenhouse gas emissions to an amount that is no more than the city of Eugene's average share of a global atmospheric greenhouse gas level of 350 ppm by 2100. Thank you for taking the time to read through my testimony- I look forward to your decision!

Best,

Allison Clark
