Committee:

House Committee On Rules

Measure, Appointment or Topic:

HB3971

Dear Chair Bowman and Members of the House Committee on Rules,
I strongly encourage you to support HB 3971. We are running out of landfill areas. We must create legislation to allow facilities that capture and recycle climate damaging methane gases to be built quickly with supportive land use laws. I live in Lane County and am looking forward to the start-up of the CleanLane project that will divert an estimated 80,000 tons of trash annually from our landfill. When the project is complete and fully functioning it will capture around 90% of methane from our organic waste before it enters the landfill. Please support HB 3971.

Thank you for your work.

Laurie Moses
