Measure, Appointment or Topic:

SB1003

I believe if a person wants to end their life they can do so unaided. Forcing another person to help is asking that person to commit murder. Please do not pass any legislation that allows/causes anyone to commit murder. Not only that, but the support systems (perhaps a physician or hospital receive government funds, which then drags us ALL into being complicit in murdering) also become accomplices. Please make sure government funding (in which every taxpayer must participate) or insurance company monies (causes all insured to participate) does not aid in murdering people. Private donors should supply the funds if any additional are needed.
