SB1003

Vote no on assisted suicide

As a U.S. Army veteran who has battled depression and attempted suicide in the past, I BEG you to not support self-harm and please do not allow any doctor to assist in murder (let alone non-doctors).

God has been so kind to me through Jesus Christ, thankfully I failed in my attempted suicide and got help at a Bible believing church!... but what if instead of getting support at church, I went to a doctor and was encouraged to end my life?

With all due respect, how can you even consider passing this bill to support death?

The death penalty for a convicted guilty criminal is one thing, and that decision is made by a regulated court operating under the law... so who has this bright idea that a doctor (or even a non-doctor?!) is now qualified to be judge/ jury/ executioner? This goes beyond foolishness and insanity, this is pure evil. Margaret Sanger and Adolph Hitler would be proud.

PLEASE hear me out, don't quit reading this yet! I'm betting that the people who actually support this wickedness are the same ones that oppose the death penalty, oppose police arresting criminals, believe that drugs should be legal on the streets, and are funded by George Soros. I'm not trying to offend you, I used to be a liberal as well- until I payed attention to where this all leads and came to my senses.

Support those who are serving and those who served, and love your neighbor as yourself... Or else help kill them.

Thank you in advance for making the EASIEST decision of your life! God has placed you exactly where you are, right now, for such a time as this! We who no longer want to die, salute you.
